"Manage Agents" Module Documentation

3-1 Manage Agents (Overview)

The "Manage Agents" module is designed for managing the actions of staff agents. It includes functionalities to view, create, update, and manage agents' details and actions.

3-2 Manage Agents (Features)

1. **Agent Management**: View and manage a table of agents with columns for ID, agent name, mobile number, ID number, commercial number, email address, registration date and time, last login date and time, verification status, and actions.
2. **Agent Details Page**: View detailed information including agent details, finance transactions, event reports, and operations. Access additional actions such as history of actions, send notification, send email, send SMS, change password request, and edit registered status.
3. **Search and Export**: Search bar and export buttons for CSV and Excel formats.
4. **Add Agent**: Drawer interface to add new agent information.

3-3 Manage Agents (Endpoints)

- **Get all agents**: GET /Admin/agents
- **Create a new agent**: POST /Admin/agents
- **Get a specific agent**: GET /Admin/agents/{id}
- **Update a specific agent**: PUT /Admin/agents/{id}
- **Update agent's status**: PUT /Admin/agents/{id}/status
- **Send reset password email to agent**: POST /Admin/agents/{id}/password/send-reset-email
- **Get agent's history**: GET /Admin/agents/{id}/history
- **Change agent's password**: PUT /Admin/Auth/change-password

3-4 Manage Agents (Usage Flow)
